SALT-AWAY®

DIRECT INJECTION KIT

Remote Control Kit

The Salt-Away Direct Injection Kit comes ready to install with an easy to follow instruction manual. Available with a T fitting for most common water couplings and 5 metres of 6mm 150psi tubing to connect the reservoir to the T fitting. No wiring is needed forward of the motor as you control the unit remotely using the remote control supplied, which attaches to your keyring.

The Salt-Away Direct Injection Kit will connect to 12V or 24V power, and has an adjustable regulating valve.

Once installed all you need to do is keep the reservoir topped up with Salt-Away concentrate and flush your engine for 30 seconds after every use.

The Salt-Away Direct Injection Kit can also be purchased without the remote control unit, but this will require wiring to the manual switch supplied.

Designed for use with all inboard and inboard/outboard (stern leg) motors, the Salt-Away Direct Injection Kit will save you time and maintenance costs on your boat's motor. You just flush your engine for 30 seconds after every use. Ideal for use in moored boats, the Salt-Away Direct Injection Kit comes ready to install with all wiring and tubing. Easy to install for twin engines with an additional splitter kit.

Salt-Away is the most concentrated salt removing product available. 1 litre will make up to 512 litres of wash. Using our Mixer Unit and 40 mls of Salt-Away, this will flush your engine, wash the salt off your boat, trailer, trailer brakes and fishing gear (up to 8 metres in length), for as little as \$1.21.

Salt-Away breaks down & removes salt build-up with repeated use, and can safely be used on all metals, fibreglass, paint, rubber, plastic, chrome, glass, concrete, brick or any surface exposed to salt.

Bombardier Recreational Products (USA) recommend Salt-Away for salt removal on all Evinrude and Johnson motors. Salt-Away is made in the USA.

Salt-Away is used by the Royal Volunteer Coastal Patrol (Australia), Coast Guard (NZ) and the Royal NZ Navy

100% NON-TOXIC - 100% BIODEGRADABLE - 100% NON-HAZARDOUS
