

DESCALER

**COOLING SYSTEM CLEANER
& MARINE GROWTH REMOVER**

**FAST AND SAFE, ■
COST SAVING ALTERNATIVE**
to a mechanical cleaning
of salt water cooled cooling systems.

REMOVE AND DISSOLVE: ■
barnacles, calcium, rust, lime
and other mineral deposits.

**SUPER CONCENTRATED ■
CLEANER**
Most applications can be safely
completed within 3 hours.

**DESCALES ■
MARINE
GROWTH:**
Seacocks and
sea strainers
Heat exchangers
Sea water cooled
exhaust systems
Refrigeration
and A/C
cooling
systems

**SAFE, BIODEGRADABLE
AND NON TOXIC HIGH
STRENGTH MARINE
GROWTH REMOVER AND
COOLING SYSTEM CLEANER**

DESCALER

COOLING SYSTEM CLEANER

& MARINE GROWTH REMOVER

DIRECTIONS:

Use 4 litres of Salt-Attack Descaler super concentrate mixed up at 5 parts water to 1 part Salt-Attack to make up 20 litres, in a drum or drums.

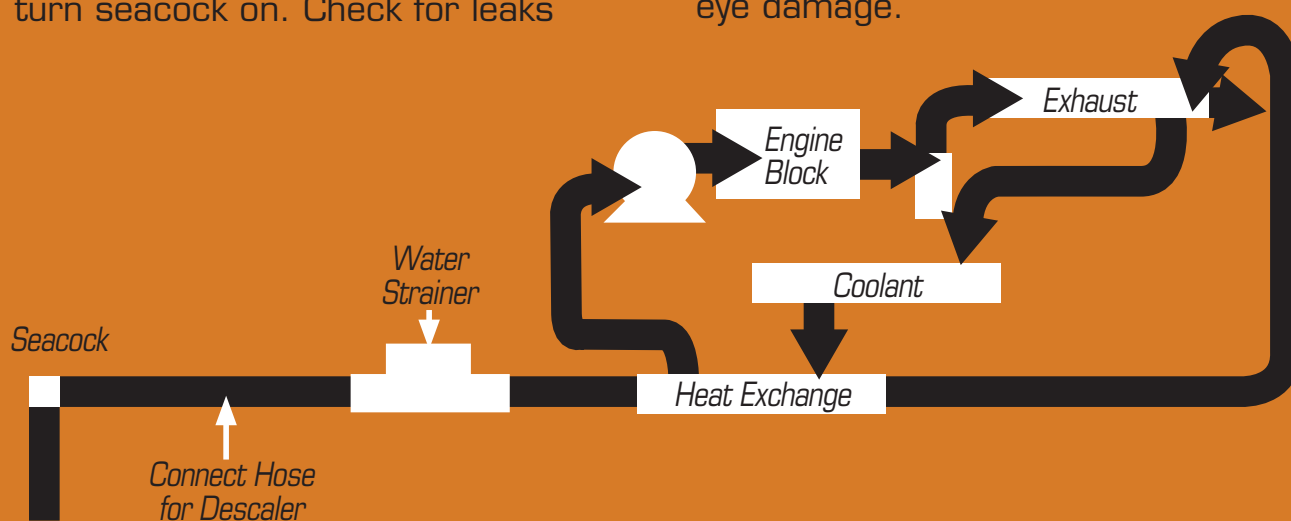

To descale cooling system, firstly turn off seacock then attach hose inline between seacock and water strainer and place pick up hose in bucket. Start engine and run all the mix into cooling system then turn engine off and leave in cooling system for 3-4 hours. Reconnect any water pipes disconnected and turn seacock on. Check for leaks

then restart engine, allowing it to run for 10 minutes to flush out dissolved marine growth and calcium.

For corrosion protection to cooling system and to stop salt build ups regularly flush with Salt-Away using our Direct Injection Kit.

CAUTION:

Avoid contact. Wear safety glasses, gloves and protective clothing. Can cause severe skin burns and eye damage.
